## Comprehensive School Improvement Plan

## OUR GOALS

## Proficiency-Based Learning

What does it look like in Pattonville?

## Proficiency-Based Learning

## What is it?

Establishing the level of student learning through demonstration of knowledge and or skill without regard for the time taken in the learning process or the structure of the delivery*

[^0]

## Proficiency-Based Learning Characteristics

## Conceptual Framework

- All students can learn
- Students learn at different rates
- Traditional structures hold time constant
- Learning becomes the variable
- Goal: Design the instructional process around the needs of the learner and use time as a variable

## High School Readiness

## Algebra

- Students move through learning based on mastering specific competencies
- Students take Algebra for high school credit anywhere from $7^{\text {th }}$ grade to a two-year algebra class in $9^{\text {th }} \& 10^{\text {th }}$ grade

## Robert Drummond PBL

- Instruction designed around the needs of learner
- Classrooms structured into Tiers (I,II, and III)
- Tier I classrooms are designed for students at or above grade level
- Tier II classrooms are designed for students one year below grade level

## Robert Drummond Elementary

- Tier III classrooms are designed for students two or more years below grade level
- Students shift classrooms (Tiers) every six weeks based on assessment data in ELA and math
- Individual Learning Plans for students in Tier II and Tier III classrooms
