Many of you are familiar with the Greek myth of Sisyphus, the ancient king who was condemned by the god of the underworld to roll a huge, immovable boulder up a steep hill only to have it roll down every time it reached the top, a process which would repeat itself endlessly. Today, a Sisyphus task is to help our families and communities move and adjust during a pandemic. The pandemic has forced us to redefine ourselves and start feeling more confident, just as Sisyphus and his labor that bears no result, and this may very well continue past the end of the tunnel, and there will be successes you will look back upon and have every reason to feel proud. As you continue to take on the tasks and challenges, you are up to the challenge, and the hard work is meaningful. You are on this task together and your work and the hard work together will change lives.

You and your staff are working to make each school day count for something — for the parents who are counting on you to provide a safe, healthy learning environment for their students during a pandemic. The information they need to function and make decisions.

First, congratulations on your outstanding accomplishments. You and your staff are working to make each school day count for something — for the parents who are counting on you to provide a safe, healthy learning environment for their students during a pandemic. The information they need to function and make decisions.

Second, take care of your faculty and staff. They are working hard and are burning out, so it is important to make sure you are taking care of them, so they can take care of you. This is the reason for taking time to recharge. It is always reassuring to know that we can network without taking large amounts of time and effort.

There is no question that this year has been a challenging one. There have been missed opportunities, missed challenges, and burnout. It is important to make sure you are taking care of yourself and your staff, so they can take care of you. This is the reason for taking time to recharge. It is always reassuring to know that we can network without taking large amounts of time and effort.
